- Message Center: 8.5%
- Patient Discovery: 4.4%
- Problems and Diagnoses: 2.9%
- Discharge: 2.0%
- Other: 1.4%
- Note: 0.4%
- Meds Rec: 0.4%
- Health Maintenance: 0.3%
- Histories: 0.2%
- Allergies: 0.0%

**Recommendations**

1. **Chart Review**
   - Set-up favorites under documentation (advanced filters)
2. **Documentation**
   - Consider moving to Dynamic Doc (currently using PowerNote)
3. **Orders**
   - Consider using Quick orders tab and building favorites
4. **Additional**
   - Recommend trying to utilize the clinical support staff as much as possible. Have them enter as much data as possible during triage. Example: medication documentation and histories. (Office staff not currently doing this during intake)
