

Powerchart Touch Changes

New additional functionality available for Powerchart Touch

New Navigation Component and Document Display

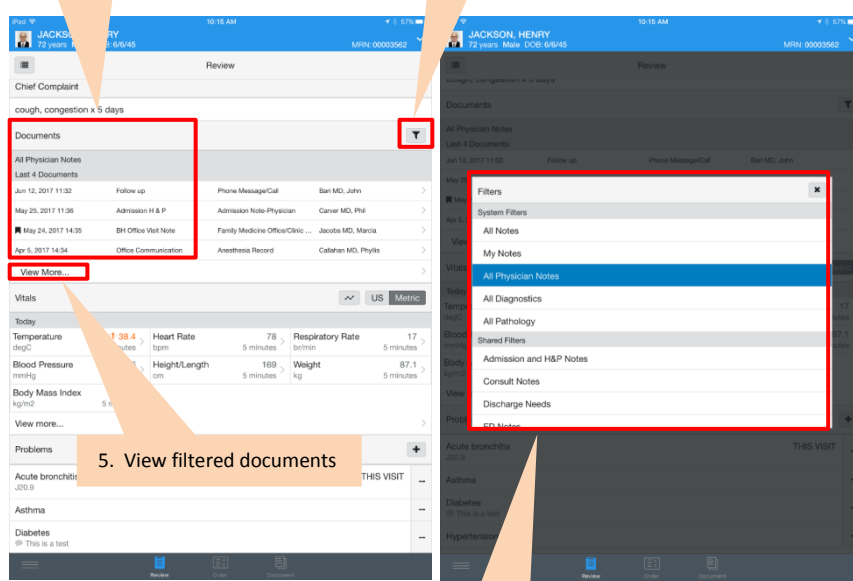

1. New Navigation component allows you to jump to a section without scrolling.
2. New documents will display last four physician notes.
3. Filters are available via funnel icon.
4. System, shared and personal filters will be available.
5. Once filter is applied, select "view more" to display more documents.

 Navigation Component and Document Display

2. Document display

3. Funnel icon

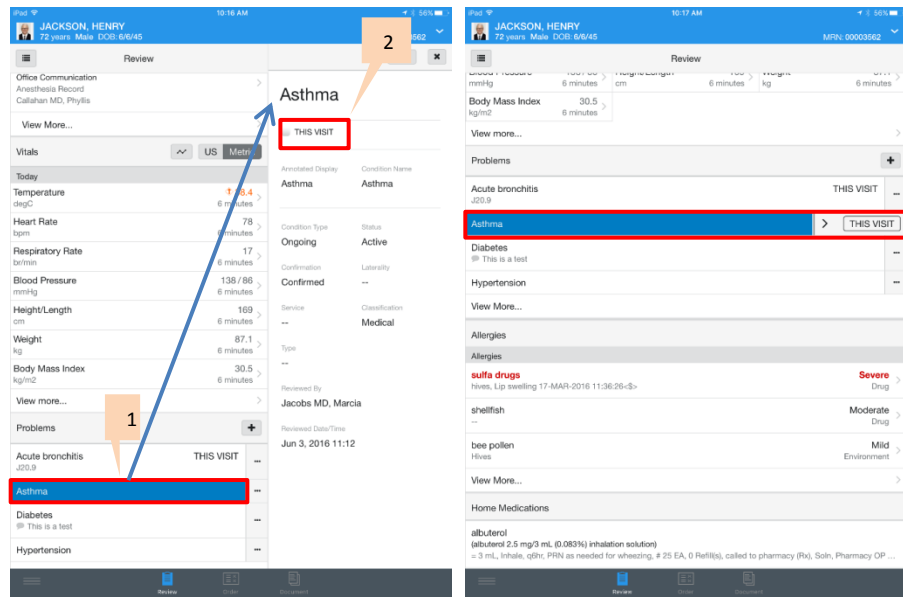

5. View filtered documents

4. Available filters

Problems/Diagnosis Updates

1. Select Problem to view details in right column.
2. Select "this visit" box and save to make diagnosis. You may also select three dots (...) and tap "this visit" instead of swiping left on problem to make diagnosis.

Problems/Diagnosis

Diagnosis and Pathology

1. **Diagnostics and Pathology** will now display as **last document**.

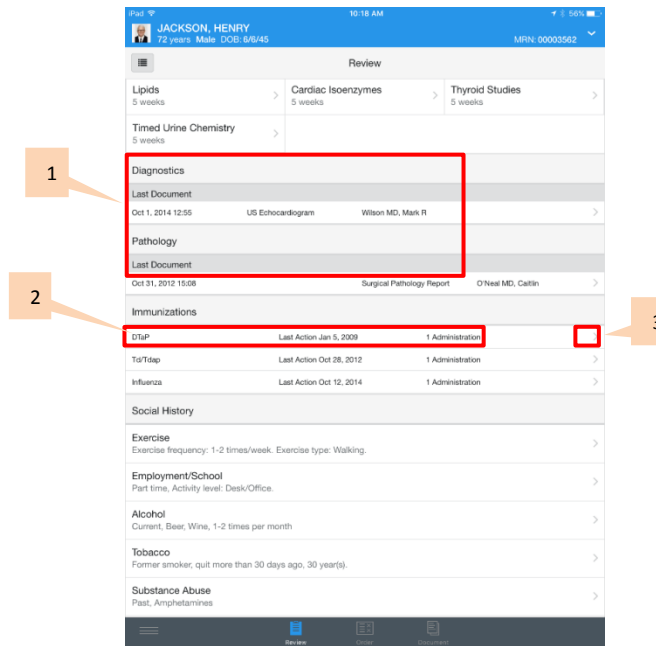

If applicable, select "view more" for more results to display.

Immunizations

Immunizations will no longer display dots (...)

2. **Immunization Type, Last Action Date** and **Number of Administrations** will be listed.
3. Select immunization to view details on the right.

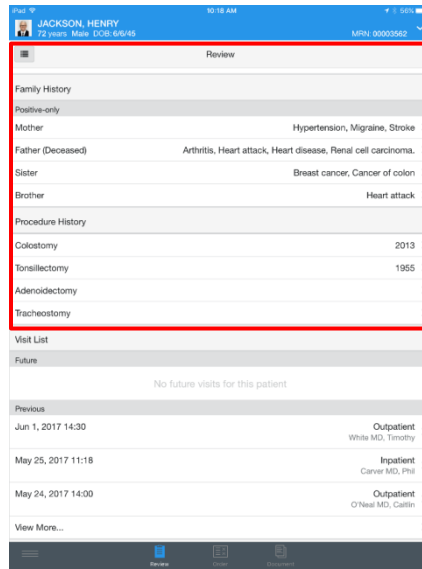

Diagnosis, Pathology and Immunizations

Histories

Histories will be listed on the **Review Page**. This will eliminate having to search individual folders.

Histories

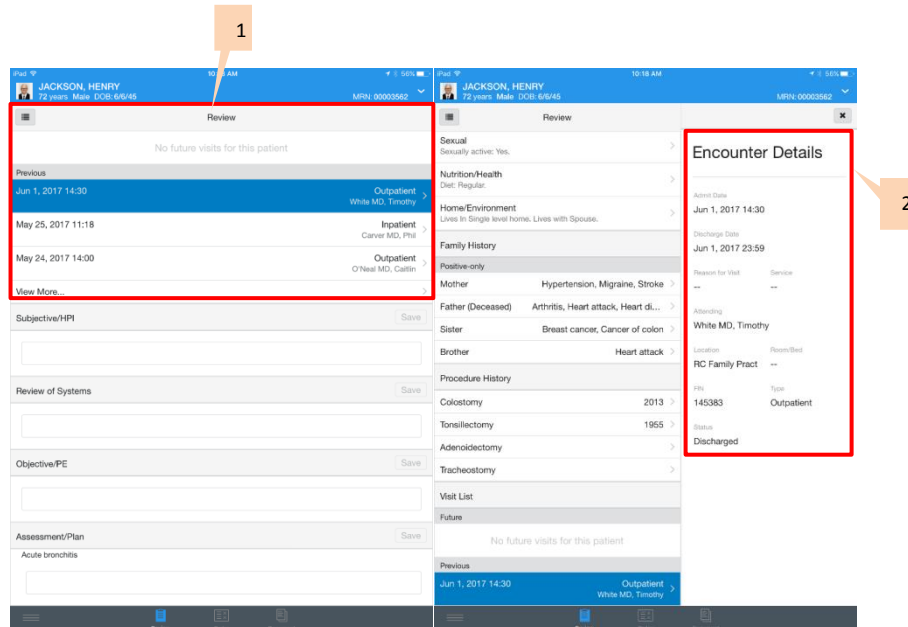

Visit Display

Timeline has been removed for visits.

1. Visits are now listed on **Review Page**.
2. Select a visit for details to display on right hand side of screen.
