

Success Spotlight

Ms. Chavous came to Levindale following an extended stay at Northwest Hospital due to COVID-19 exposure. She arrived at Levindale on April 10th vent dependent and needing total care. With the help of our excellent respiratory therapists, physicians, and nurses Ms. Chavous was able to wean completely from the ventilator. Not only was she able to be weaned off the ventilator but she was able to regain her independence by working with our physical, occupational, and speech therapists in Levindale's Acute Rehab program. The team at Levindale is so thrilled that Ms. Chavous was able to walk out of Levindale on June 5th into the loving arms of her family!
