

Success Spotlight

Edna came to Levindale following a stay at Northwest Hospital due to COVID-19 exposure. She suffered severe shortness of breath, was found to have an acute pulmonary embolism, bilateral DVT's, and congestive heart failure. She arrived at Levindale on May 21st to our subacute unit very deconditioned. With the help of our excellent rehab team, physicians, and nurses Edna was able to return home with the help of home healthcare on June 23th. The team at Levindale is excited that Edna was able to return home after an extensive recovery!
