

Success Spotlight

Mr. Green admitted to Levindale's High Intensity Care Unit on May 6 on full ventilator support due to COVID-19 following an extensive stay at Mercy Medical Center. Levindale's dedicated team of nurses, physicians, and respiratory therapists helped wean Mr. Green from the ventilator where he was eventually decannulated.

During his recovery at Levindale Mr. Green participated in our acute rehab program that consists of physical, occupational, and speech therapy. Due to Levindale's comprehensive team of physicians, nurses, therapists, pharmacists, dieticians, and social workers Mr. Green was able to walk out of Levindale to return home with his family on June 29!
