

# LIMB LENGTHENING

**Title:** Clinical Evaluation of the Ellipse Intramedullary Limb Lengthening System (IMLL).

**Purpose:** To collect data regarding use of the Intramedullary Limb Lengthening System (IMLL) as an intramedullary limb-lengthening device for febur or tibia. To assess the effectiveness of the IMLL system and compare the IMLL outcomes with previously collected data of the ISKD (Orthofix) intramedullary lengthening device.

**Principal Investigator:** [John E. Herzenberg, M.D.](#)

**Phase:** III
